Welcome to the Westin Bayshore Vancouver,

At Westin, the safety and security of our guests is of the utmost importance to us, and we follow very strict procedures in the case of all emergency situations.

In the unlikely event of an emergency situation occurring during your stay, please rest assured that all of our Westin Bayshore leaders and associates have been fully trained in handling emergency situations.

We have a comprehensive procedure for many different situations, and there is both a Manager on Duty and a First Aid attendant on site 24 hours per day. For any emergency, please press “7777” from any house phone for immediate assistance.

Should a situation of fire or emergency occur, at first you will hear our emergency bells ring intermittently. At this time, we would ask that you remain calm, and listen to the announcements over our public address system. During this “intermittent” stage, we are investigating the cause of the alarm or emergency and ask that you stay where you are to await further instruction. At this time, the elevators will be out of service until operations resume.

After 5 minutes, if the alarm is still ongoing, the bells will switch to a steady and consistent ring. This is your indication that we are evacuating the building. Announcements will be made to indicate an evacuation is required. Please proceed to the nearest exit, all emergency exits have the red exit sign above the doorway. It is always a good idea to review the building floor plan on the back of your guestroom door upon check-in, this will allow you to become familiar with the closest exit from your guestroom.

Should you wish to review any of our procedures in more detail, please do not hesitate to contact the Manager on Duty at any time. The Hotel’s map and safety evacuation procedure is also posted on the back of each guestroom door.

The Management Team
